RTD Theory - Pyromation -
Ecological systems theory, also
called development in context or
human ecology theory, identifies
five environmental systems with
which an individual interacts. This
theory provides the framework
from which community
psychologists study the
relationships with individuals'
contexts within communities and
the wider society. Ecological
systems theory was developed by
Urie Bronfenbrenner. Tue, 13

Self-determination theory (SDT)
motivation and personality that
concerns people's inherent growth
tendencies and innate
psychological needs. It is
concerned with the motivation
behind choices people make
without external influence and
interference. SDT focuses on the
degree to which an individual's
behavior is self-motivated and
self-determined. Wed, 14 Mar
2018 20:06:00 GMT
